Marilyn is very professional, patient and flexible. What impressed me right from the start, was that Marilyn took the time to meet with me face to face. She also gave a list of detailed questions to help pre-determine what my needs were of the site. Marilyn had great suggestions and insights into the whole process and I am very pleased with the results. One comment on my website was that it was 'a feast for the eyes and easy to navigate!' Marilyn was very accommodating and understanding through this whole process which was greatly appreciated. I will definitely be recommending you to others.

Working with Marilyn turned a complicated project into an enjoyable learning experience. The Calgary Jung Society chose Marilyn to upgrade our existing website after an extensive invitation-to-tender process because she not only offered the best value for money but, unlike many other companies competing for our business, she paid real attention to the specifics of what we were looking to achieve. Sometimes working to tight deadlines and at others being asked to wait while decisions were made, Marilyn always responded to what we needed. With her keen eye for design she took our ideas and made them appealing, up-to-date, user-friendly and memorable. Moreover, when we needed something she wasn't familiar with she would come back quickly with well-researched, achievable ideas. She has delivered us a site that we are frankly delighted with.

Marilyn was to help me with correcting my original website, however, after viewing the professional appearance of some of her other websites, I knew that starting fresh on mine was a good idea. The visual effects that she created were eye catching and creative. She took the time to explain her services thoroughly to me in regards to what I could expect with the finished product. Her price for the finished project was very reasonable for the amount of time she spent with me in person, and emailing back and forth. I am certain that the website will be a valuable tool for my business in the future.

She came at this project from a technical perspective as well as a user's perspective. The end result is a welcoming, clean looking and user-friendly web site.
